

Exercise plan :
**Neck and upper limb
strengthening**

Patient:
Andy Rubio

Date:
18th May 2026

Isometric Neck Flexion

Place your palm on your forehead, and resist flexion of your neck while keeping your head still. Hold, and then relax. You should feel the muscles at the front and side of your neck contracting.

Complete up to 5 times as able and as long as they are comfortable

Video: <http://youtu.be/WnKcq1Uh8m4>

Isometric Neck Extension

Place your palm on the back of your head, and resist tilting your head backwards. Your head will stay fairly still. You may feel a gentle contraction of the muscles at the back of your neck.

Complete up to 5 times as able and as long as they are comfortable

Step Up with Arm Elevation Band

Wrap an exercise band around your hands, with your hands facing inward. Stand facing a step and place one foot on the step. Elevate your arms above your head while exerting some pressure on the band. As you step back down, bring your arms back down. Repeat on the opposite leg. This is a gluteal, scapular and posterior rotator cuff activation exercise.

Up to 5-10 reps on each leg
Complete once or twice a week as able

External Rotation with Band

Tuck your elbow in, keeping it next to your body, and move your arm outwards away from your stomach, using the band for resistance. This is an important strengthening exercise for the rotator cuff shoulder muscles.

Up to 5-10 reps on each arm

Video: <http://youtu.be/KZpckJLRhaE>

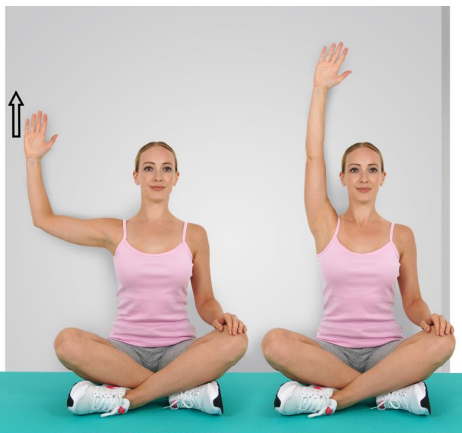

Single Arm Bent Over Row with Dumbbell

Lean forwards to a 45-degree angle, and pull a weight backwards with one hand keeping your elbow tucked in close to your body. To make the exercise harder, stand on one leg. This is a back and shoulder strengthening exercise.

Up to 5-10 reps on each arm as able

Seated Wall Angel One Arm (Progressions seen in below images)

Sit next to a wall with legs crossed. Place one arm at shoulder level, with your elbow bent. Slide your elbow up the wall as far as feels comfortable. Return to the start position. This exercise can help improve shoulder mobility and posture.

Little and often as able: progressions seen below
